Unwinders ARG

The ARG unwinders are used to take up tube coils of plastic or metal, such as corrugated tube, insulating hose, hydraulic or compressed air hose, and similar materials up to a max. coil weight of 30 kg. Likewise the devices can be used for light wiring harnesses.

The rotary plate with inner ball-bearing support permits easy pull-off of the material; the 200 mm high perimeter wrap protection effectively prevents the plies from falling off the rotary plate. An integrated brake reduces the afterrun of the rotary plate after an abrupt draw of a processing machine.

The wrapping bars, 390 mm in length, can be very easily adapted to different core diameters of the tube coils. In addition to the floor-mounted device, a table-version is also available.

For the medical industry the wrap protection can be executed in stainless steel.

	ARG600	ARG800	ARG1000	ARG1200
Length	760 mm	960 mm	1160 mm	1360 mm
Width	760 mm	960 mm	1160 mm	1360 mm
Height	1260 mm	1260 mm	1260 mm	1260 mm
Discharge height	870 mm	870 mm	870 mm	870 mm
Core diameter	130 - 380 mm	200 - 600 mm	240 - 800 mm	240 - 800 mm
Weight	38 kg	52 kg	73 kg	94 kg
