## Hotmelt Machine KAG 100

The hotmelt machine KAG100 from Kolb is suited for the hotmelt of small component, particularly for seal on the wire, i.e. on the contact. Through this measure insulation and mechanical protection are ensured. Thus connection systems can withstand extreme conditions, such as heat, dust or moisture.

With the hotmelt machine, Kolb offers a cost-effective solution that is suitable for small production runs.

### Technical Data

|                                      |                          |
|--------------------------------------|--------------------------|
| Power                                | 350 W                    |
| Display                              | LED                      |
| Molding pressure                     | up to 6 bar              |
| Molding temperature                  | 50 – 250 °C              |
| Consumption each cycle               | approx. 0,1 l je Verguss |
| Tank capacity                        | 200 ml                   |
| Electric supply                      | 230 V or 3x 400 V, 50 Hz |
| Pnematic supply                      | 7 bar, dry and oilfree   |
| Dimensions (Length x Width x Height) | 700 x 200 x 500 mm       |
| Weight                               | approx. 6 kg             |
